

Organisation of emergency services

Organisation of emergency services

Emergency services such as the fire brigade, police and ambulance service must have defined roles and areas of responsibility to ensure a coordinated response during a crisis. Members of these teams must be included in the planning phase to ensure that the final plan is practicable and reflects the situation on the ground. Summary box 33.13 Disaster planning /uni25CF /uni25CF /uni25CF Identification of hospitals able to take large numbers of casualties and the location of areas that can be used for patient holding and triage in case of mass casualties is important. Hospitals that offer specialised services should be identified and their role during a major crisis defined. Suitable hospitals in the surrounding areas must be designated as overflow hospitals in the eventuality of a very large volume of patients.

Disaster can be anticipated and should be prepared for Evacuation of a whole population may be the best option Coordination between military, police, fire, ambulance and medical services is important
