

Orogastric or nasogastric tube

Orogastric or nasogastric tube

An orogastric or nasogastric tube may be placed for some abdominal surgery if the stomach is distended and obscuring the view . It is not necessary in all cases and is very rarely used in other minimal access surgery . Where possible, it should be regains consciousness. This is most commonly used in bariatric and oesophagogastric surgery , where a larger (32F or 34F) tube is used. Orogastric or nasogastric tube
