

# 08 - Problems associated with employment or unempl

## Problems associated with employment or unemployment

Clinical Descriptions and Diagnostic Requirements for ICD-11 Mental, Behavioural or Neurodevelopmental Disorders Other specified problems associated with social or cultural environment Problems associated with social or cultural environment, unspecified Problems associated with employment or unemployment Problems associated with unemployment Problems associated with a change of job Problems associated with threat of job loss Problems with employment conditions Problem associated with uncongenial work Problem associated with stressful work schedule Other specified problem with employment conditions Occupational exposure to risk factors Burnout • Burnout is a syndrome conceptualized as resulting from chronic workplace stress that has not been successfully managed. It is characterized by three dimensions: feelings of energy depletion or exhaustion; increased mental distance from one's job, or feelings of negativism or cynicism related to one's job; and a sense of ineffectiveness and lack of accomplishment. Burnout refers specifically to phenomena in the occupational context and should not be applied to describe experiences in other areas of life.
